

MACCHERONCINI DI CAMPOFILONE

Pasta, Missy Robbins

REST

20-30 min at room temperature

DETAILS

- Dough: egg-dough
- Region: The Marche, province of Fermo, around Ascoli Piceno and Campofilone

METHOD

1. Make an egg-based dough, then roll and sheet it.
2. Give a wooden work surface a light dusting of 00 flour. Line a sheet pan with parchment, then dust the parchment with semolina.
3. Knife the sheets into 18-inch lengths and trim the ragged edges off. Save the trim for soup. Keep the sheets under plastic or a towel.
4. Fold one sheet in half, then in thirds, until you have a packet about 4 1/2 by 6 inches. Turn it so the long side faces you and trim the ends. Cut 1/10-inch strands, working inward from one edge.
5. Dust the strands heavily with 00 flour and shake them apart. Coil the batch into a nest on the pan.
6. Repeat with the rest of the sheets.
7. Dry 20 to 30 minutes at room temperature.
8. To hold, cover the pan with plastic and refrigerate up to 24 hours.

SHAPING

NOTES

Cut width is 1/10 inch, by hand off a folded packet. No cutter attachment.
 The book also describes the shape as often under 1 mm wide, which is thinner than the 1/10 inch the cutting step specifies. Treat 1/10 inch as the working figure.
 Thinner than tagliolini, which is itself a thinner tagliatelle. Same family as tamarin.
 Cooks very fast and goes to mush if it sits. Sauce it immediately.
 Coiled into a nest, not spread flat.
 Refrigerated shelf life is 24 hours.
 Traditional pairings are a beef-spiked red sauce or a fish ragu. Robbins prefers the meat version.
