MANDILLI DI SETA

REGION	REST
Liguria, especially around Genoa	**20-30 min at room temperature**

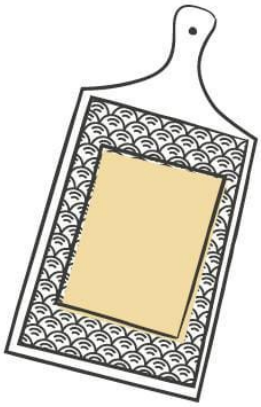

METHOD

1. Make an egg-based dough, then roll and sheet it.
2. Give a wooden work surface a light dusting of 00 flour. Line a sheet pan with parchment, then dust the parchment with semolina.
3. Knife the sheets into 4 by 4 1/2-inch rectangles and trim the ragged edges off. Save the trim for soup. Keep the rectangles under plastic or a towel.
4. Texture each rectangle on a cavarola board. Dust the board with 00 flour, lay one sheet on it with the long side running vertically, and roll a pin over it two or three times under moderate pressure until the board's pattern is pressed into the pasta. The pass also thins and lengthens the sheet.
5. Dust every sheet generously with 00 flour, then pile them on the pan 8 to 10 sheets deep.
6. Repeat the cutting, texturing, and stacking with the rest of the sheets.
7. Dry 20 to 30 minutes at room temperature.
8. To hold, cover the pan with plastic and refrigerate up to 24 hours.

3

4

5

NOTES

Cut size is 4 by 4 1/2-inch rectangles. There is no strand width here, since these are sheets rather than ribbons.
A cavarola board is the tool for step 4. Without one, run the sheets through the sheeter once more at the same setting and skip straight to dusting and stacking.
Stack 8 to 10 sheets per pile on the pan.
These are essentially extra-thin lasagna sheets. Boil them fast and coat them fast, or the layers fuse into accidental lasagna.
Refrigerated shelf life is 24 hours.
Pesto Genovese is the main pairing. Fresh tomato or a light vegetable such as zucchini also works.

DOUGH

Egg Dough

Makes: 954 g / Active Time: 8-10 min kneading / Rest: 30 min minimum, wrapped

INGREDIENTS

500 g	Tipo 00 flour
454 g	Egg yolks
as needed	Extra 00 flour for kneading
up to 1 tbsp, only if dry	Room-temperature water

METHOD

1. Mix the yolks lightly, without beating them.
2. Mound the flour on a wooden surface and open a well 5 to 6 inches across. Wider than that and the walls collapse.
3. Add half the yolks, drawing in flour from the inner wall with a fork, working round the circumference.
4. Add the rest the same way. If the wall breaks, scrape the escape back into the flour until the mass holds itself.
5. Knead 8 to 10 minutes: press down and away with the heel of your hand, rotate 180 degrees, fold, repeat. Scrape your hands and the board as you go.
6. Add water a tablespoon at a time only if it stays dry and refuses to come together.
7. Stop when it is smooth, firm, and springs back slightly when poked. The texture to aim for is Play-Doh.
8. Wrap and rest at least 30 minutes before rolling.

NOTES

454 g of yolks is roughly 24 to 26 eggs, so plan what the whites are for.
Yolks only, no whites and no whole eggs, which is what makes this rich and tender rather than elastic.
Dry winter air is the usual reason it will not come together. Flour the board sparingly, since excess dries it out.
Keeps 24 hours. Chilled overnight, pull it out 20 minutes before rolling.
