

48-HOUR CHOCOLATE CHIP

YIELD	REST	OVEN	ENERGY COST
18 cookies	48 h minimum	375F, 12-14 min	\$1.51 (14 min bake plus 30 min, 3.5 kW at 59 cents/kWh)

INGREDIENTS

113 g	Unsalted butter, for the toffee
220 g	Light brown sugar, for the toffee
5 g	Kosher salt, for the toffee
226 g	Unsalted butter, to brown
2, to stop the browning	Ice cubes
100 g	Granulated sugar
330 g	Dark brown sugar
6 g	Espresso powder
12 g	Kosher salt
3 g	Baking soda
2	Eggs
10 ml	Vanilla extract
313 g	All-purpose flour
170 g	70% cacao chocolate, chopped
to top	Maldon sea salt

METHOD

1. Make the toffee: melt the butter, add brown sugar and salt, cook until thick, cool completely.
2. Brown the other butter, drop in the ice cubes to halt it, then cool until solid.
3. Cream the solid brown butter with both sugars until light.
4. Mix in espresso powder, salt and baking soda.
5. Add eggs one at a time, then the vanilla.
6. Add flour, mix to just combined.
7. Fold in the chopped chocolate, then the cooled toffee pieces.
8. Chill 48 hours. That wait is the entire premise.
9. Scoop 7.5 cm apart, top with Maldon, bake at 375F for 12 to 14 minutes.

NOTES

Two sub-preparations before the dough even starts, toffee and brown butter.
Espresso powder and 12 g salt are both doing flavour work against 430 g of sugar.
Longest lead time in the set by far.

LEARNINGS

- Too sugary. 430 g of sugar against 313 g of flour is the problem, and the espresso powder and 12 g of salt do not pull it back. 2 out of 5 across the board, the lowest of the ten chocolate chip recipes.
- Bake in rings for 11 minutes rather than scooping free-form for 12 to 14. The rings hold the shape and the shorter bake keeps the centre from drying out.
- Not worth the 48-hour lead time at this score.
