STRANGOZZI ALLA NORCINA

REGION	SERVES	TOTAL TIME
Central	**4-6**	**45 min plus the dough rest**

INGREDIENTS

40 g	Oil-packed anchovy fillets, coarsely chopped
5 g	Garlic, roughly chopped
60 g	Fresh black truffle, coarsely chopped
30 to 60 g	Water
42 g	Olive oil
1 batch	Egg dough
30 g	Unsalted butter, cold and cubed
quantity not given	Fresh black truffle, for shaving, optional

METHOD

1. Put the anchovies, garlic, truffle and 30 g of the water into a high-speed blender. You want only enough water to get the blades to catch. Puree to a fine paste.
2. Keep the blender on high and pour the olive oil in gradually until the paste is well emulsified. Set it aside.
3. Make 624 g of strangozzi from the egg dough.
4. Salt a large pot of water generously and bring it to a rolling boil.
5. Cook the strangozzi 3 to 5 minutes, to tender. Being a thick pasta it keeps some bite rather than going soft the way fettuccine does.
6. While it boils, set a large saute pan over low heat. Stir the truffle-anchovy paste together with 2 to 3 ladles of pasta water, 115 g to 170 g.
7. Lift the pasta across with tongs or a pasta basket and raise the heat to medium. Toss 1 to 2 minutes to marry it to the sauce.
8. Add the butter and keep tossing. A splash of pasta water loosens the sauce if it tightens. It is married when it clings with a glossy sheen.
9. Divide between bowls. Shave fresh truffle over the top if you have any to spare.

NOTES

Two different dishes carry this name. This is the one built on black truffle, anchovy and garlic pounded to a paste, not the sausage-and-heavy-cream version that dominates the search results.
Preserved black truffles will stand in for fresh, though quality varies drastically between brands. Savini sliced summer truffles in oil are a reliable option.
Fresh winter and summer black truffles are seasonal and come from specialty purveyors outside Italy. Around Norcia in Umbria they are everyday cooking, used as freely as garlic.
Start the paste with 30 g of water and add more only if the blender will not pull the mixture down. Too much water and the oil will not emulsify properly.

SHAPE
Strangozzi

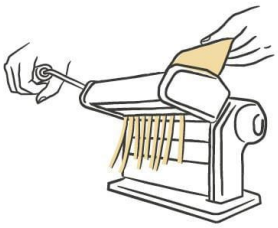

Region: Umbria, chiefly around Spoleto, where it is also called stringozzi / Rest: 30-40 min at room temperature

METHOD

1. Make an egg-based dough, then roll and sheet it.
2. Give a wooden work surface a light dusting of 00 flour. Line a sheet pan with parchment, then dust the parchment with semolina.
3. Knife the sheets into 9-inch lengths and trim the ragged edges off. Save the trim for soup. Keep the sheets under plastic or a towel.
4. Fit the fettuccine cutter to a hand-crank machine or the KitchenAid attachment.
5. Hold one end of a sheet, feed the other end into the cutter, and crank, keeping the sheet nearly perpendicular to the rollers. Catch the strands underneath with your free hand.
6. Dust the strands generously with 00 flour and shake them apart. Bend the batch into a horseshoe and set it on the pan.

7. Repeat with the rest of the sheets.
8. Dry 30 to 40 minutes at room temperature.
9. To hold, cover the pan with plastic and refrigerate up to 24 hours.

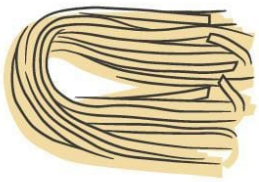

SHAPING

1

2

3

NOTES

Cut on the fettuccine cutter. The book gives no strand width for this shape.
Sheets are 9 inches long, shorter than the 18 inches used for most of the nest-coiled ribbons.
Drying runs 30 to 40 minutes, longer than the 20 to 30 most hand-cut ribbons get.
Shaped into a horseshoe rather than a nest.
A thicker, sturdier fettuccine. The extra body is what lets it carry heavy sauces.
Refrigerated shelf life is 24 hours.
Best with black truffle in a sauce of garlic, anchovy, and olive oil. Also good with a peppery tomato sauce alla spoletina, with meat ragu, or alla norcina.

DOUGH

Egg Dough

Makes: 954 g / Active Time: 8-10 min kneading / Rest: 30 min minimum, wrapped

INGREDIENTS

500 g	Tipo 00 flour
454 g	Egg yolks
as needed	Extra 00 flour for kneading
up to 1 tbsp, only if dry	Room-temperature water

METHOD

1. Mix the yolks lightly, without beating them.
2. Mound the flour on a wooden surface and open a well 5 to 6 inches across. Wider than that and the walls collapse.
3. Add half the yolks, drawing in flour from the inner wall with a fork, working round the circumference.
4. Add the rest the same way. If the wall breaks, scrape the escape back into the flour until the mass holds itself.
5. Knead 8 to 10 minutes: press down and away with the heel of your hand, rotate 180 degrees, fold, repeat. Scrape your hands and the board as you go.
6. Add water a tablespoon at a time only if it stays dry and refuses to come together.
7. Stop when it is smooth, firm, and springs back slightly when poked. The texture to aim for is Play-Doh.
8. Wrap and rest at least 30 minutes before rolling.

NOTES

454 g of yolks is roughly 24 to 26 eggs, so plan what the whites are for.
Yolks only, no whites and no whole eggs, which is what makes this rich and tender rather than elastic.
Dry winter air is the usual reason it will not come together. Flour the board sparingly, since excess dries it out.
Keeps 24 hours. Chilled overnight, pull it out 20 minutes before rolling.
