STRANGOZZI

REGION	REST
Umbria, chiefly around Spoleto, where it is also called stringozzi	**30-40 min at room temperature**

METHOD

1. Make an egg-based dough, then roll and sheet it.
2. Give a wooden work surface a light dusting of 00 flour. Line a sheet pan with parchment, then dust the parchment with semolina.
3. Knife the sheets into 9-inch lengths and trim the ragged edges off. Save the trim for soup. Keep the sheets under plastic or a towel.
4. Fit the fettuccine cutter to a hand-crank machine or the KitchenAid attachment.
5. Hold one end of a sheet, feed the other end into the cutter, and crank, keeping the sheet nearly perpendicular to the rollers. Catch the strands underneath with your free hand.
6. Dust the strands generously with 00 flour and shake them apart. Bend the batch into a horseshoe and set it on the pan.
7. Repeat with the rest of the sheets.
8. Dry 30 to 40 minutes at room temperature.
9. To hold, cover the pan with plastic and refrigerate up to 24 hours.

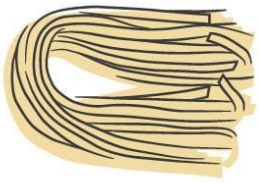

SHAPING

1

2

3

NOTES

Cut on the fettuccine cutter. The book gives no strand width for this shape.
Sheets are 9 inches long, shorter than the 18 inches used for most of the nest-coiled ribbons.
Drying runs 30 to 40 minutes, longer than the 20 to 30 most hand-cut ribbons get.
Shaped into a horseshoe rather than a nest.
A thicker, sturdier fettuccine. The extra body is what lets it carry heavy sauces.
Refrigerated shelf life is 24 hours.
Best with black truffle in a sauce of garlic, anchovy, and olive oil. Also good with a peppery tomato sauce alla spoletina, with meat ragu, or alla norcina.

DOUGH

Egg Dough

Makes: 954 g / Active Time: 8-10 min kneading / Rest: 30 min minimum, wrapped

INGREDIENTS

500 g	Tipo 00 flour
454 g	Egg yolks
as needed	Extra 00 flour for kneading
up to 1 tbsp, only if dry	Room-temperature water

METHOD

1. Mix the yolks lightly, without beating them.
2. Mound the flour on a wooden surface and open a well 5 to 6 inches across. Wider than that and the walls collapse.
3. Add half the yolks, drawing in flour from the inner wall with a fork, working round the circumference.
4. Add the rest the same way. If the wall breaks, scrape the escape back into the flour until the mass holds itself.

5. Knead 8 to 10 minutes: press down and away with the heel of your hand, rotate 180 degrees, fold, repeat. Scrape your hands and the board as you go.
6. Add water a tablespoon at a time only if it stays dry and refuses to come together.
7. Stop when it is smooth, firm, and springs back slightly when poked. The texture to aim for is Play-Doh.
8. Wrap and rest at least 30 minutes before rolling.

NOTES

454 g of yolks is roughly 24 to 26 eggs, so plan what the whites are for.
Yolks only, no whites and no whole eggs, which is what makes this rich and tender rather than elastic.
Dry winter air is the usual reason it will not come together. Flour the board sparingly, since excess dries it out.
Keeps 24 hours. Chilled overnight, pull it out 20 minutes before rolling.
