CARAMELLE

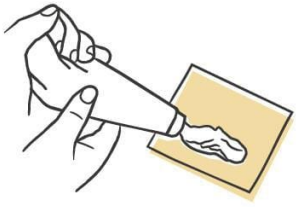

REGION	REST
Emilia-Romagna, and widely made in the United States	**45 minutes to 1 hour uncovered in the refrigerator**

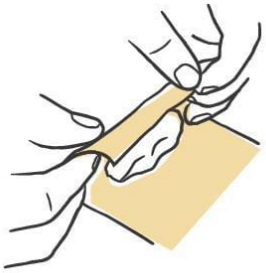

METHOD

1. Make your chosen egg-based dough, then roll and sheet it.
2. Dust a wooden board with 00 flour. Cover a sheet pan with parchment, then dust the parchment with semolina.
3. Lay one sheet on the board. Using a straight-edged dough divider, cut it into 2 1/2 by 3-inch rectangles. A plain pastry cutter with a ruler, or a knife with a ruler, works too. Keep the rectangles under plastic wrap or a towel.
4. Load the filling into a pastry bag cut to a 1/2-inch opening. Pipe a rope of filling 1 1/2 inches long, sitting roughly 1/2 inch back from the wide (3-inch) bottom edge.
5. Roll that bottom edge gently over the filling into a cylinder. Press down with an index finger at each end of the filling to seal the dough, forcing the air out.
6. Pinch the closure on each side of the filling with thumb and index finger so it looks like a wrapped candy.
7. Set the piece on the prepared pan. Fill and roll the rest of the rectangles, keeping them in a single layer, and dust the pan again with semolina.
8. Repeat with the remaining sheets.
9. Refrigerate uncovered for 45 minutes to 1 hour to dry. Covered pieces sweat and get too wet. To hold longer, lay plastic wrap loosely over the pan and refrigerate up to 8 hours.

NOTES

Sheet is cut into 2 1/2 by 3-inch rectangles with a straight-edged dough divider, so the finished piece has plain, not fluted, ends.
Filling per piece: a rope 1 1/2 inches long, set 1/2 inch in from the 3-inch-wide edge, piped through a 1/2-inch opening. The rope is half the length of the edge it sits on, which leaves bare dough at each end for the pinched twists.
The 3-inch side is the bottom edge, so the roll axis runs along the long side of the rectangle.
Seal geometry: roll into a cylinder, press at each end of the filling with your index fingers to force out air, then pinch each end into a candy-wrapper twist. There is no braid and no fluted edge.
No misting step is called for. The book goes straight from piping the filling to rolling the cylinder.
Can be made long and thin, like a small Tootsie Roll, or shorter and fatter, like saltwater taffy.
Storage: 45 minutes to 1 hour uncovered to dry, then up to 8 hours refrigerated under loose plastic.
Served with any sauce that will not hide the shape, such as a drizzle of balsamic or a plain butter sauce. With no traditional preparation of its own, it is used as freely as ravioli.

DOUGH

Egg Dough

Makes: 954 g / Active Time: 8-10 min kneading / Rest: 30 min minimum, wrapped

INGREDIENTS

500 g	Tipo 00 flour
454 g	Egg yolks
as needed	Extra 00 flour for kneading
up to 1 tbsp, only if dry	Room-temperature water

METHOD

1. Mix the yolks lightly, without beating them.
2. Mound the flour on a wooden surface and open a well 5 to 6 inches across. Wider than that and the walls collapse.
3. Add half the yolks, drawing in flour from the inner wall with a fork, working round the circumference.
4. Add the rest the same way. If the wall breaks, scrape the escape back into the flour until the mass holds itself.
5. Knead 8 to 10 minutes: press down and away with the heel of your hand, rotate 180 degrees, fold, repeat. Scrape your hands and the board as you go.
6. Add water a tablespoon at a time only if it stays dry and refuses to come together.
7. Stop when it is smooth, firm, and springs back slightly when poked. The texture to aim for is Play-Doh.
8. Wrap and rest at least 30 minutes before rolling.

NOTES

454 g of yolks is roughly 24 to 26 eggs, so plan what the whites are for.
Yolks only, no whites and no whole eggs, which is what makes this rich and tender rather than elastic.
Dry winter air is the usual reason it will not come together. Flour the board sparingly, since excess dries it out.
Keeps 24 hours. Chilled overnight, pull it out 20 minutes before rolling.
