# PANSOTTI

| REGION | REST |
| --- | --- |
| **Liguria** | **45 minutes to 1 hour uncovered in the refrigerator** |

## METHOD

1. Make your chosen egg-based dough, then roll and sheet it.
2. Dust a wooden board with 00 flour. Cover a sheet pan with parchment, then dust the parchment with semolina.
3. Lay one sheet on the board. Using a straight-edged dough divider, cut it into 4 by 3 1/2-inch rectangles. A plain pastry cutter with a ruler, or a knife with a ruler, works too. Keep the rectangles under plastic wrap or a towel.
4. Load the filling into a pastry bag cut to a 1-inch opening. Pipe a generous mound of filling, roughly the size of a walnut still in its shell, into the middle of each rectangle.
5. If the dough feels dry rather than moderately tacky, mist it with a spray bottle held 8 to 10 inches above the board. Skip this if the dough is already tacky.
6. Bring one long side up over the filling until it meets the opposite long side, edges aligned.
7. Pinch the edge shut around the filling with thumb and index finger. Work back and forth a few times and push all the air out.
8. Press a dimple into the center of the filled side with your thumb.
9. Grip the two bottom tips of the rectangle between thumbs and index fingers. Draw one tip around to join the other in front of the filling, so the dough forms a collar across it, then pinch the pair shut.
10. Set the piece on the prepared pan. Fill and fold the rest of the rectangles, keeping them in a single layer, and dust the pan again with semolina.
11. Repeat with the remaining sheets.
12. Refrigerate uncovered for 45 minutes to 1 hour to dry. Covered pieces sweat and get too wet. To hold longer, lay plastic wrap loosely over the pan and refrigerate up to 8 hours.

## NOTES

Sheet is cut into 4 by 3 1/2-inch rectangles with a straight-edged dough divider, so the edges are plain.
Filling per piece: a generous mound, roughly the size of a walnut still in its shell, piped through a 1-inch opening. That volume is what gives the shape its paunch.
Seal geometry: fold long side to long side rather than corner to corner, pinch the edge, dimple the filled side, then pull the bottom tips around to join in front of the filling as a collar. The book gives that front closure as the difference from tortelli, which folds to a triangle instead.
Air must be forced out of the edge before the collar is formed.
Traditional filling is prescinsêua, a sour Ligurian cheese, or ricotta with parmigiano, mixed with preboggion, a foraged blend of wild greens and herbs. Usual candidates include nettle, chard, borage, parsley, poppy, wild chicory, and anise. Aim for herbal, bitter, and aromatic in combination.
Storage: 45 minutes to 1 hour uncovered to dry, then up to 8 hours refrigerated under loose plastic.
Served in salsa di noci, the Ligurian walnut sauce. Butter and pasta water also works, since the filling carries the dish.
Source note: the book's piping step says to place filling in the center of each circle, but the pieces cut in the previous step are rectangles.

DOUGH

## Egg Dough

*Makes: 954 g / Active Time: 8-10 min kneading / Rest: 30 min minimum, wrapped*

**INGREDIENTS**

| | |
|---|---|
| **500 g** | Tipo 00 flour |
| **454 g** | Egg yolks |
| **as needed** | Extra 00 flour for kneading |
| **up to 1 tbsp, only if dry** | Room-temperature water |

**METHOD**

1. Mix the yolks lightly, without beating them.
2. Mound the flour on a wooden surface and open a well 5 to 6 inches across. Wider than that and the walls collapse.
3. Add half the yolks, drawing in flour from the inner wall with a fork, working round the circumference.
4. Add the rest the same way. If the wall breaks, scrape the escape back into the flour until the mass holds itself.
5. Knead 8 to 10 minutes: press down and away with the heel of your hand, rotate 180 degrees, fold, repeat. Scrape your hands and the board as you go.
6. Add water a tablespoon at a time only if it stays dry and refuses to come together.
7. Stop when it is smooth, firm, and springs back slightly when poked. The texture to aim for is Play-Doh.
8. Wrap and rest at least 30 minutes before rolling.

**NOTES**

454 g of yolks is roughly 24 to 26 eggs, so plan what the whites are for.
Yolks only, no whites and no whole eggs, which is what makes this rich and tender rather than elastic.
Dry winter air is the usual reason it will not come together. Flour the board sparingly, since excess dries it out.
Keeps 24 hours. Chilled overnight, pull it out 20 minutes before rolling.
