MACCHERONCINI DI CAMPOFILONE

REGION	REST
The Marche, province of Fermo, around Ascoli Piceno and Campofilone	**20-30 min at room temperature**

METHOD

1. Make an egg-based dough, then roll and sheet it.
2. Give a wooden work surface a light dusting of 00 flour. Line a sheet pan with parchment, then dust the parchment with semolina.
3. Knife the sheets into 18-inch lengths and trim the ragged edges off. Save the trim for soup. Keep the sheets under plastic or a towel.
4. Fold one sheet in half, then in thirds, until you have a packet about 4 1/2 by 6 inches. Turn it so the long side faces you and trim the ends. Cut 1/10-inch strands, working inward from one edge.
5. Dust the strands heavily with 00 flour and shake them apart. Coil the batch into a nest on the pan.
6. Repeat with the rest of the sheets.
7. Dry 20 to 30 minutes at room temperature.
8. To hold, cover the pan with plastic and refrigerate up to 24 hours.

SHAPING

1 2 3 4

NOTES

Cut width is 1/10 inch, by hand off a folded packet. No cutter attachment.
The book also describes the shape as often under 1 mm wide, which is thinner than the 1/10 inch the cutting step specifies. Treat 1/10 inch as the working figure.
Thinner than tagliolini, which is itself a thinner tagliatelle. Same family as tajarin.
Cooks very fast and goes to mush if it sits. Sauce it immediately.
Coiled into a nest, not spread flat.
Refrigerated shelf life is 24 hours.
Traditional pairings are a beef-spiked red sauce or a fish ragu. Robbins prefers the meat version.

DOUGH

Egg Dough

Makes: 954 g / Active Time: 8-10 min kneading / Rest: 30 min minimum, wrapped

INGREDIENTS

500 g	Tipo 00 flour
454 g	Egg yolks
as needed	Extra 00 flour for kneading
up to 1 tbsp, only if dry	Room-temperature water

METHOD

1. Mix the yolks lightly, without beating them.
2. Mound the flour on a wooden surface and open a well 5 to 6 inches across. Wider than that and the walls collapse.
3. Add half the yolks, drawing in flour from the inner wall with a fork, working round the circumference.
4. Add the rest the same way. If the wall breaks, scrape the escape back into the flour until the mass holds itself.
5. Knead 8 to 10 minutes: press down and away with the heel of your hand, rotate 180 degrees, fold, repeat. Scrape your hands and the board as you go.
6. Add water a tablespoon at a time only if it stays dry and refuses to come together.
7. Stop when it is smooth, firm, and springs back slightly when poked. The texture to aim for is Play-Doh.
8. Wrap and rest at least 30 minutes before rolling.

NOTES

> 454 g of yolks is roughly 24 to 26 eggs, so plan what the whites are for.
> Yolks only, no whites and no whole eggs, which is what makes this rich and tender rather than elastic.
> Dry winter air is the usual reason it will not come together. Flour the board sparingly, since excess dries it out.
> Keeps 24 hours. Chilled overnight, pull it out 20 minutes before rolling.
