CORZETTI WITH SUNGOLD TOMATOES, PECORINO, AND HERBS

SERVES	TOTAL TIME
4-6	**1 h plus the dough rest**

INGREDIENTS

500 g	Sungold tomatoes
56 g	Olive oil
40 g	Garlic, finely chopped
quantity not given	Salt
1 batch	Egg dough
30 g	Unsalted butter, cold and cubed
22 g	Pecorino romano, finely grated
5 g	Chervil, tender leaves
5 g	Basil, small to medium leaves
5 g	Marjoram leaves

METHOD

1. Bring a large pot of water to the boil and set a colander inside an ice-water bath.
2. Nick a small X in the base of each tomato with a sharp paring knife. Drop them into the boiling water for 5 to 10 seconds to loosen the skins, lift them into the ice bath with a slotted spoon, and after 30 seconds move them to a bowl.
3. Peel the tomatoes over a second bowl so you catch whatever juice runs out. Throw the skins away.
4. Put the olive oil and garlic into the bowl of tomato juice, then the peeled tomatoes and salt, and stir it all together. Set aside.
5. Stamp 80 corzetti from the egg dough.
6. Salt a large pot of water heavily and bring it to the boil.
7. Cook the corzetti 1 to 2 minutes. They want to be tender, not soft.
8. While they boil, tip the whole contents of the tomato bowl into a large saute pan over low heat. Cook 1 to 2 minutes, crushing the tomatoes lightly with the back of a spoon so they give up their juice.
9. Add the butter and one ladle of pasta water, about 55 g, and swirl to emulsify.
10. Lift the pasta across with a spider, raise the heat to medium and swirl 1 to 2 minutes to marry, turning the corzetti with a spoon so every face gets coated. More pasta water loosens the sauce if it tightens. It is ready when it clings with a gloss.
11. Plate in a single layer and spoon the sauce left in the pan over each portion. Garnish with the pecorino, then the chervil, basil and marjoram.

NOTES

> Peeling the tomatoes is the technique the dish turns on. Without their skins they absorb the marinade and then the sauce, instead of holding both out.
> Sungolds are a high-summer tomato, which fixes the window for this one.
> The tomatoes barely cook, 1 to 2 minutes, only long enough to release juice.
> Peel over a bowl. The juice you catch is the base of the marinade.

SHAPE
Corzetti

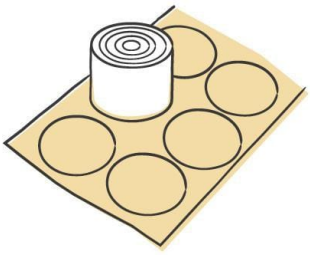

Region: Liguria / Rest: 15 to 20 minutes at room temperature

METHOD

1. Make an egg-based dough, then roll and sheet it.
2. Dust a wooden cutting board lightly with 00 flour. Set out a parchment-lined sheet pan, dusted lightly with semolina.
3. Lay a sheet on the board. Cut coins with the hollow side of the corzetti stamp, spacing the cuts 1/8 inch apart.
4. Turn the stamp over to the carved side and press it onto each coin. Press hard enough to leave a clear impression without flattening the disc. Dust one or both faces of the coin with 00 flour if it sticks in the stamp.

5. Lay the stamped coins in a single layer on the pan. Separate additional layers with semolina-dusted parchment.
6. Work through the remaining sheets the same way.
7. Dry 15 to 20 minutes at room temperature. To hold, wrap the pan and refrigerate up to 24 hours.

SHAPING

1

2

3

NOTES

Requires a corzetti stamp — a carved wooden stamp, hollow on one face to cut the coin and carved on the other to imprint it.
Coins are cut 1/8 inch apart on the sheet.
If the stamp's cutting edge has dulled and no longer cuts cleanly, cut the coins with the ring from a set of round pastry cutters, then imprint with the stamp.
Two shapes share the name. The other is a figure-eight gnocco pressed with two fingers, called croset, crosit, or crosetti. This entry is the stamped coin, also called croxetti or corzetti stampati.
Keeps refrigerated up to 24 hours.
Served with herb sauces such as pesto, or with vegetables in season. A chestnut dough version is paired with mushrooms and parmigiano in winter.

DOUGH

Egg Dough

Makes: 954 g / Active Time: 8-10 min kneading / Rest: 30 min minimum, wrapped

INGREDIENTS

500 g	Tipo 00 flour
454 g	Egg yolks
as needed	Extra 00 flour for kneading
up to 1 tbsp, only if dry	Room-temperature water

METHOD

1. Mix the yolks lightly, without beating them.
2. Mound the flour on a wooden surface and open a well 5 to 6 inches across. Wider than that and the walls collapse.
3. Add half the yolks, drawing in flour from the inner wall with a fork, working round the circumference.
4. Add the rest the same way. If the wall breaks, scrape the escape back into the flour until the mass holds itself.
5. Knead 8 to 10 minutes: press down and away with the heel of your hand, rotate 180 degrees, fold, repeat. Scrape your hands and the board as you go.
6. Add water a tablespoon at a time only if it stays dry and refuses to come together.
7. Stop when it is smooth, firm, and springs back slightly when poked. The texture to aim for is Play-Doh.
8. Wrap and rest at least 30 minutes before rolling.

NOTES

454 g of yolks is roughly 24 to 26 eggs, so plan what the whites are for.
Yolks only, no whites and no whole eggs, which is what makes this rich and tender rather than elastic.
Dry winter air is the usual reason it will not come together. Flour the board sparingly, since excess dries it out.
Keeps 24 hours. Chilled overnight, pull it out 20 minutes before rolling.
