PAPPARDELLE

REGION	REST
Found throughout Italy, densest in Tuscany	**20-30 min at room temperature**

METHOD

1. Make an egg-based dough, then roll and sheet it.
2. Give a wooden work surface a light dusting of 00 flour. Line a sheet pan with parchment, then dust the parchment with semolina.
3. Knife the sheets into 9-inch lengths and trim the ragged edges off. Save the trim for soup.
4. Dust each sheet lightly with 00 flour and stack them neatly two or three high. Run a fluted pastry cutter around every edge of the stack so all four sides come out ruffled.
5. Starting at the long edge of the stack, cut 1 1/4-inch strips working inward. A ruler or straightedge keeps the lines honest until the fluted cutter feels familiar.
6. Pull the strips apart, dust each one lightly with 00 flour, then restack them 10 to 12 pieces high and set the stacks on the pan.
7. Repeat with the rest of the sheets.
8. Dry 20 to 30 minutes at room temperature.
9. To hold, cover the pan with plastic and refrigerate up to 24 hours.

SHAPING

1 2 3 4

NOTES

> Cut width is 1 1/4 inches, with a fluted pastry cutter. All four edges of the stack get ruffled before the strips are cut.
> Sheets go 9 inches long, stacked two or three high to cut. The finished strips get restacked 10 to 12 high on the pan.
> Robbins makes a second version from her chickpea dough alongside the egg-dough one.
> Refrigerated shelf life is 24 hours.
> Pairs with any ragu that suits, historically game ragu such as rabbit or hare, and also with chickpeas and rosemary.

DOUGH

Egg Dough

Makes: 954 g / Active Time: 8-10 min kneading / Rest: 30 min minimum, wrapped

INGREDIENTS

500 g	Tipo 00 flour
454 g	Egg yolks
as needed	Extra 00 flour for kneading
up to 1 tbsp, only if dry	Room-temperature water

METHOD

1. Mix the yolks lightly, without beating them.
2. Mound the flour on a wooden surface and open a well 5 to 6 inches across. Wider than that and the walls collapse.
3. Add half the yolks, drawing in flour from the inner wall with a fork, working round the circumference.
4. Add the rest the same way. If the wall breaks, scrape the escape back into the flour until the mass holds itself.

5. Knead 8 to 10 minutes: press down and away with the heel of your hand, rotate 180 degrees, fold, repeat. Scrape your hands and the board as you go.
6. Add water a tablespoon at a time only if it stays dry and refuses to come together.
7. Stop when it is smooth, firm, and springs back slightly when poked. The texture to aim for is Play-Doh.
8. Wrap and rest at least 30 minutes before rolling.

NOTES

454 g of yolks is roughly 24 to 26 eggs, so plan what the whites are for.
Yolks only, no whites and no whole eggs, which is what makes this rich and tender rather than elastic.
Dry winter air is the usual reason it will not come together. Flour the board sparingly, since excess dries it out.
Keeps 24 hours. Chilled overnight, pull it out 20 minutes before rolling.
