ZUCCHINI GALETTE

SERVES
6

INGREDIENTS

1 1/2 lb, about 3 medium-large	Zucchini
3 tbsp	Unsalted butter
1 medium	Yellow onion, thinly sliced
3 sprigs	Fresh thyme
4 oz	Gruyere, grated on the large holes
2 oz, about 1/2 cup	Parmesan, finely grated
1, divided	Egg
a pinch	Ground nutmeg
to taste	Kosher salt and freshly ground black pepper

METHOD

1. Make and chill the whole wheat crust.
2. Caramelise the sliced onion in the butter with the thyme sprigs.
3. Prepare the zucchini and draw its water out before it goes near the pastry. This is the step the whole recipe turns on.
4. Roll the crust out, layer on the cheeses, the caramelised onion and the zucchini, seasoning with salt, pepper and the nutmeg.
5. Fold the border over the filling and brush the pastry with egg.
6. Bake until the crust is crisp and golden.

NOTES

A wet filling ruins a galette, and zucchini at 1 1/2 lb is mostly water. Salting and draining it first is what keeps the base crisp.
Gruyere on the large holes but parmesan finely grated, so they behave differently: one melts into pockets, the other seasons throughout.
The egg is listed as divided, so part goes in the filling and part is the wash.
The source is a video and its description gives the ingredient list but no oven temperature, no bake time and no quantities for the seasoning. Those are absent here rather than guessed. A galette of this size normally wants a hot oven, around 400F, for 45 minutes or so, but that figure is not from the source.

DOUGH

Whole Wheat Galette Crust

Yield: 1 galette, serves 6

INGREDIENTS

1 cup	Whole wheat flour
1/2 cup	All-purpose flour
2 tsp	Sugar
1 tsp	Diamond Crystal kosher salt
10 tbsp	Unsalted butter, chilled, in 1/2 inch pieces
1/2 cup	Ice water

METHOD

1. Whisk the flours, sugar and salt together.
2. Toss the chilled butter through the flour and work it in until the pieces are flattened but still visible. Do not rub it to sand.
3. Add ice water a little at a time, tossing, until it just holds together.
4. Shape to a disc, wrap, and chill before rolling.

NOTES

Two thirds whole wheat to one third all-purpose, which is where the nutty flavour comes from.
10 tbsp of butter to 1.5 cups of flour is a high fat ratio, and the 1/2 inch pieces are meant to stay visible. Those sheets of butter are what make it flaky rather than short.
Ice water, and chilled butter, both non-negotiable for flakiness.
The source is a video. Its description lists these quantities but not the mixing steps, so the method below is the standard sequence for a flaky pastry of this type rather than a transcript.
